GitHub: <https://github.com/Mongolma> | **Portfolio:** <https://github.com/Mongolma/portfolio>

Software Developer

Seeking a dynamic entry level software development position to further enhance in-depth knowledge of software development. A self-motivated problem-solver with experience demonstrating flexibility and adaptability in complex situations, which developed the skills needed to be a successful web developer.

Technical Skills

Programming languages: HTML, CSS, JavaScript, Node.js

Database Management: MySQL, MongoDB

Libraries/ Frameworks: jQuery, Bootstrap, Express, Sequelize, Handlebars, Mongoose, React

Projects

Worldwide Travel Assistant

<https://github.com/Mongolma/world-wide-travel-assistant> | <https://mongolma.github.io/world-wide-travel-assistant/>

By using the visiting city, start travel date, and end travel date, Worldwide Travel Assistant will initialize a server-side API from <https://calendarific.com/>, providing them with holiday information as useful facts about their destination.

Weather Dashboard

https://mongolma.github.io/weather_dashboard/ | <https://github.com/Mongolma/weather-dashboard>

It's given a weather dashboard with form inputs which takes the city name. Once a user provides a city name it will present current and future weather of that city and its added to the search history.

Eat Da Burgers

<https://github.com/Mongolma/burgers> | <https://fathomless-coast-95343.herokuapp.com/>

This application used MVC programming paradigm to create a full stack application. It can take orders and update the status by clicking the 'devour' button.

Note Taker

<https://github.com/Mongolma/note-taker> | <https://khas.herokuapp.com/notes>

This is a simple calendar application that allows the user to save events for each hour of the day.

Code quiz

<https://github.com/Mongolma/code-quiz> | <https://mongolma.github.io/code-quiz/>

This is timed code quiz with multiple-choice questions for who learning coding.

Day Scheduler

This is simple calendar application that allows the user to save events for each hour of the day.

<https://mongolma.github.io/work-day-schedule/> | <https://github.com/Mongolma/work-day-schedule>
